

Tabel 1 - Weerhouden projecten in het kader van de “Research Platforms - IT security”-projectoproep 2014-2015

Begunstigden(n)	Titel
SIRRIIS	SeCloud: Security-driven Engineering of Cloud-based Applications
UCL	Scaut: Side-channel Security for Authenticated Encryption
ULB	Spices : Scalable Processing and mining of Complex Events for Security-analytics
ULB	Brufence: Scalable machine learning for automating defense system
VUB	C-Cure: Cost Sensitive Dynamical User Authentication with REinforcement Learning

Tabel 2 - Projecten van ondernemingen op het vlak van cybersecurity

Jaar	Programma	Begunstigde(n)	Titel
2019	Joint R&D	NVISO + VUB	Applying distributed multi-agent models for the detection of cyber-attacks across the kill chain
2018	EU - EUREKA ITEA	Nviso	SCRATCH: SeCuRe and Agile Connected Things
2018	R&D projects	Degetel + ULB	PHILEAS: smart monitoring par détection de comportements anormaux appliquée aux objets connectés
2018	Joint R&D	Proximus + ULB	MUFINS — Multi-Fidelity Intelligent Network System for crowd monitoring
2017	Joint R&D	Worldline + ULB	DEFEAT FRAUD: Assessment and validation of deep feature engineering and learning solutions for fraud detection
2017	R&D projects	ContactOffice + ULB	CoCryptApp — Mobile app voor geëncrypteerde e-mailberichten
